

THE NEXT BIG PASSIVE INCOME PRINTER ON THE BINANCE SMART CHAIN NETWORK

INTRODUCTION

Vitalik's Kitchen is a 100% fully

Decentralized BNB Mining investment
dApp. It simulates gold mining, but instead
of gold, you will actually mine BNB coins.

The base ROI is 0.5-3% per day. You hire miners (Chefs), and they do the work for you while you sleep. The more BNB you invest/stake, the more miners (Chefs) you will be able to hire.

Dapp: vkitchen.tech

Verified Smart Contract

Vkitchen contract code is written in solidity language and is open source/visible on bscscan.com

The contract is rug free with no backdoor/vulnerability and immutable, meaning there are no functions that the dev/hacker can use to drain or change the contract operations.

The probability of VK contract getting empty is highly unlikely due to our 0.5%-3% maximum daily return & considering that many users are compounding their daily returns for larger future profits.

ABOUT VKITCHEN

In April 30th 2022, a Talented programmer, Alex Shrem by name created a Decentralized Finance (De-Fi) application called Vitalik's Kitchen

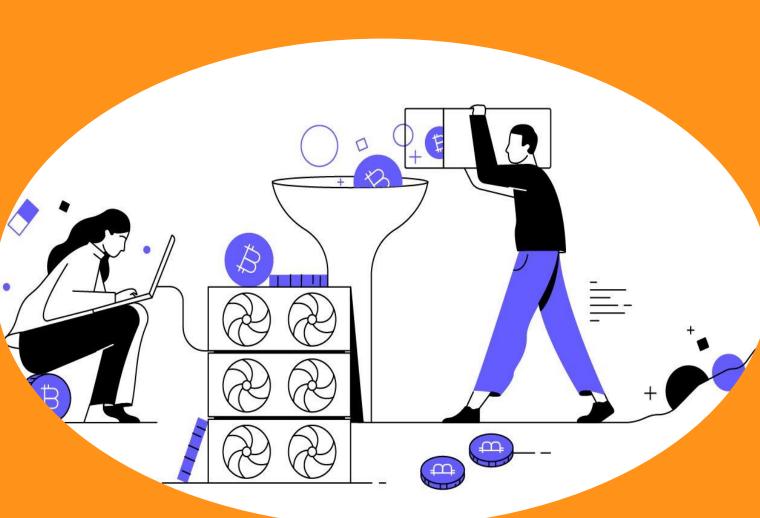

This application is built on the most famous blockchain "BSC" to execute millions of transactions safely per micro second without the need of any 3rd party intermediary. It serves as a decentralized banking system

How does this platform work?

This platform works similarly to a financial market, where an asset has intrinsic value that is relative to the supply or demand of a said asset. Chefs are purchased with a pre-determined currency called BNB at a price comparable to Chefs current efficiency rate. After the Deposit is performed, they work for you immediately to give you the best yield on your investment for as long as possible. Like any other asset bought and sold on an open market, the Chefs price will fluctuate over time, as will the Chefs efficiency rate, as you re-deposit, compound earnings, and as well as sell profits (Devour Dishes). To put it, the more demand for the Chefs, the more they will increase in value and the more yield they will produce. Inversely, when the demand decreases, so will the value of the Chefs and their daily return on investment.

HOW TO MINE BNB IN VITALIK'S KITCHEN

Enter BNB Amount > Enter Kitchen > Compound > Withdraw > Profit!

Step 1. Download Trust Wallet/Metamask From play store or app store

Step 2. Fund your wallet with BNB

Step 3. Connect your Wallet to Vkitchen using BNB Smart Chain

Step 4. Enter BNB Amount and Click on Enter the Kitchen (Deposit)

Note: You cannot withdraw this deposit.

Step 5. You can compound manually AKA "Withdraw and redeposit" using the Devour and Enter Kitchen method to increase your Chefs.

Step 6. Alternatively, you can Claim Your Rewards for the current BNB value you have earn, and your rewards will begin filling again.

Rewards will continue filling the Your Rewards with BNB non stop

It is not necessary, nor recommended, to keep your computer device on to mine. The contract will automatically authorize your Chefs to mine whether you are connected to the site or not. Be green, save on electricity and turn off your computer when you are not using it.

Strategies & Additional Information

#1 Strategy

Vitalik's Kitchen is for users who want long term profits and sustainability. It is not for people who want instant profits.

Vitalik's Kitchen is not to be confused with staking farms. Chefs are not bought, they're hired, therefore can not be sold. Once Chefs are hired they work for you indefinitely, providing you with an unlimited amount of BNB at a starting rate of 0.5%-3% daily.

Our algorithm allows every participant to profit handsomely, no matter their strategy but it will not allow any single participant to have an unfair advantage over other participants.

While the Vitalik's Kitchen algorithm makes sure that all participants receive their fair share of rewards, it also favours its most supportive participants through its compounding option AKA "Withdraw & Redeposit".

#2 Strategy

Strategies are personal: you either strictly compound AKA "Claim & Redeposit", strictly Devour Your BNB or you do a healthy combination of both. In our opinion the best strategy is to compound as often as profitable, considering transaction gas. Once you're happy with your daily, weekly or monthly results, take profits as often as you see fit and simply continue compounding the rest.

#3 Strategy

Keep in mind that the 0.5%-3% is not completely constant, it will vary slightly based on a combination of factors, including your personal hiring, Claiming, compounding habits and the habits of the community as a whole. Your personal habits hold much more weight in regards to your overal personal returns. Also remember, just as that number can decrease it also increases based on a combination of those same habits.

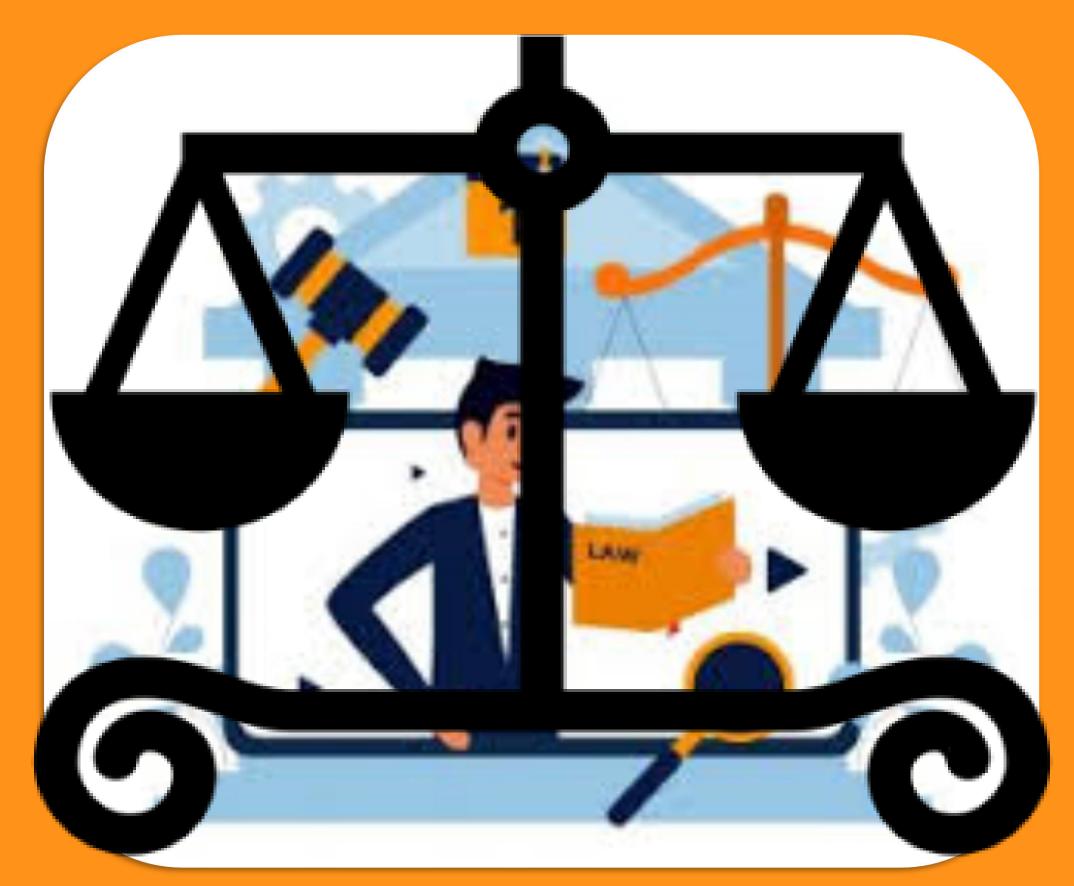

#4 Strategy

After hiring any number of Chefs, you will begin to see returns very close to the advertised 0.5%-3% daily, this number will rise and/or fall based on the factors explained above. We will not attempt to share any exact numbers because it's a little too complicated due to the cryptocurrency market volatility. Vitalik's Kitchen is a complete and 100% fully automated De-Fi, no developer interaction is necessary.

What Happens If I Always Claim My Rewards?

If you always Claim, your daily percentage will drop dramatically and will not receive the highest daily returns. This is the antiwhale mechanism that helps so the TVL is not drained.

As long as there is TVL in the contract then there will always be rewards. The hungry people who claim too much get punished and get lower and lower rewards.

Sustainability

Unlike its predecessors which paid 100% daily, causing instant and massive inflation, Vitalik's Kitchen pays a modest 0.5%-3% daily.

Vitalik's Kitchen pays aprox. 0.5-3% daily, according to the current mining efficiency rate. The mining efficiency rate rises and falls as you and other players hire Chefs, compound earnings and Claim BNB Rewards.

OUR ROAD MAP

PROJECT INFRASTRUCTURE

After much work on my mega ecosystem project "Cash Printer" an idea of building the most sustainable BNB De-Fi Miner was conceived

PROJECT LAUNCH

In April, Vkitchen was Launched successfully.

The world was ready for a decentralized banking system and they did embrace it

NFTs MARKETPLACE COLLECTION

Just so you know, Alex is a very talented programmer who have people at heart. I will deploy the NFT marketplace by 2023. some good percentage of the royalty feed will be allocated into vkitchen pool for longevity

Q1 – Q2 2023

LAUNCHPAD RELEASE

Members will be able to buy into hidden gem projects before anyone else does, then resell it into the market upto even 10,000%

STAKEHOLDERS

Q1-Q2 2023

MARKETING

We have grown the community to over 113,000 transactions recorded on the blockchain and it's time to go straight to the moon with the speed of light. We have all it takes as a community to rewrite the biggest story in the history of De-Fi

NODES

DEX & CHARITY

We grow by helping others. With our DEX & CHARITY, we will extend help to the less privileged, needy, orphans, widows, prisoners, countries suffering from war, clmate change and lots more...

TERMINOLOGIES

O1 CRYPTOCURRENCY

Digital currency, which is an alternative form of payment created using encryption algorithms.

O2. BLOCKCHAIN

A dairy that is decentralized, distributed ledger that stores the record of ownership of digital assets. Any data stored on blockchain is unable to be modified, making the technology a legitimate disruptor for industries like payments, cybersecurity and healthcare.

03. WEB3.0

The future of the internet. The vision for this new blockchain-based web includes cryptocurrencies, NFTs, DAOs, DeFi, Metaverse, and more.

Web3 offers a read/write/own version of the web, in which users have a financial stake in and more control over the web communities they belong.

SMART CONTRACT

A digital code used to exchange assets including shares, money, or property without the need for any intermediates.

DEFI (DECENTRALIZED FINANCE 05.

An emerging technology that removes third parties and centralized institutions from financial transactions.

DAPP 06.

An application built on a decentralized network that consists of a smart contract backend and a user interface frontend. DApps are 'permissionless,' meaning anyone is free to use them. Indeed, many DApps include smart contracts others have written. They are also transparent and 'trust less,' meaning anyone can verify their authenticity and functionality.

BNB 07.

A cryptocurrency (formerly known as Binance Coin) stands for Build and Build." Along with fueling transactions on BNB Chain

COMPOUND INTEREST ON COMPOUNDING 1.5% DAILY
